## Education

| Examination | Degree | Institute         | Year |
|-------------|--------|-------------------|------|
| Graduation  | B.Tech | Sharda University | 2027 |

## Professional Summary

Computer Science (B.Tech) student with strong **Data Structures and Algorithms (DSA)** and **Object-Oriented Programming (OOP)** foundations in **Java**, **Python**, and **TypeScript**. Internship experience building a production full-stack platform with **REST APIs**, **PostgreSQL**, and **AI-powered internal tools** (LLM, RAG) used to run business operations. Strong **problem-solving**, **debugging**, and **analytical thinking** with a **collaborative mindset**; eager to learn **API integrations**, **data pipelines**, concurrency, and performance basics. Seeking an **Associate Software Development Engineer (Backend)** role to learn, grow, and ship reliable software.

## Experience

**Konkuwan Herbs Pvt. Ltd. — Intern** May – July 2026  
*Full-Stack Software Development* Puri, Odisha, India

- Independently designed and shipped a production-ready full-stack ERP/CRM used to run the company's public commerce, order management, and farm operations (FarmOps) end-to-end.
- Built the backend with Express.js and Supabase (PostgreSQL), exposing REST APIs with JSON data consumed via TanStack Query, and enforced role-based access control (RBAC) across 6 permission levels.
- Developed AI-powered internal tools (CropOS, FarmerOS, War Room) for farm and business operations, including a RAG-style briefing engine that grounds LLM-generated crop and finance reports in live data.
- Debugged and resolved a critical database split-brain (data inconsistency) issue by unifying the backend on Supabase as a single source of truth, then deployed to Cloudflare Workers.
- Tech:** React, Vite, Tailwind CSS, Express.js, REST APIs, Supabase (PostgreSQL), TanStack Query, Cloudflare Workers, LLM/RAG

**Web Developer, Diplomacia IITM MUN Society** 2023–24  
*Technical Team* IIT Madras

- Developed responsive, interactive web solutions for online MUN events as part of the technical team, enhancing user engagement.
- Tools:** HTML, CSS, JavaScript, Node.js, React

## Achievements & Certifications

- Oracle Academy Java Programming Certification
- Advanced SQL Certification on HackerRank
- Introduction to Generative AI Studio
- 5-Star Badge in C and Python on HackerRank
- Introduction to Prompt Engineering with GitHub Copilot
- Google AI Fundamentals

## Projects

### Lumina - Universal Wisdom Guide:

*RAG-powered AI application*

- Developed a RAG-powered comparative theology AI by integrating the Gemini API, delivering scripturally grounded guidance from Islamic and Hindu traditions, with strict retrieval rules enforcing mandatory multi-verse citations and original scripture text (Arabic/Sanskrit) to minimize hallucinations.
- Implemented dual-response chat, real-time voice streaming with TTS, and feedback-driven response refinement.
- Designed a secure backend with Supabase Auth, PostgreSQL, and Row-Level Security (RLS) for per-user data isolation.
- Tech:** React, TypeScript, Tailwind CSS, Gemini API, Supabase (PostgreSQL), RAG

### Roommate Expense Tracker:

- Built a shared-expense tracker with transaction logging, structured data models, and real-time debt summaries.
- Handled edge cases in balance calculations to improve accuracy and **reduce manual errors by 40%**.
- Tech:** JavaScript, React, Node.js

### Typing Master:

- Web app to measure typing speed (WPM/CPM), accuracy, and errors in real-time, with a countdown timer and detailed session results.
- Fully responsive interface built using HTML5, Tailwind CSS, and JavaScript.

## Skills

- Languages:** Java, Python, TypeScript, JavaScript, C/C++
- Frameworks:** React, Node.js, Express.js, HTML/CSS, Tailwind
- Concepts:** DSA, OOP, REST APIs, JSON, Authentication, RBAC, LLMs & RAG
- Tools:** Git/GitHub, Docker, Cloudflare Workers, Cursor
- Databases:** PostgreSQL, Supabase, SQL
